FEATURED VARIETIES

Height 25' Spread 20' Zone 3

Blue Diamond Spruce

This selection of Colorado Blue Spruce has intensely blue colored needles with a silver overlay that is similar to Hoopsii Spruce but with the traditional Colorado Spruce shape and texture. This spruce would make a great specimen that would give brilliant contrast to any landscape. The Blue Diamond originated Deurne, the Netherlands.

Height 25' Spread 20' Zone 2

Starlite™ Crabapple

Upright shape with outstanding resistance to apple scab. Pretty white flowers in the spring. The fruit is very small and shiny, bright red in color. The fruit is retained well into the winter months and adds to this cultivar's ornamental value. Viewed as a great improvement to Spring Snow Crabapple.

Height 40' Spread 30' Zone 4

Regal Petticoat® Maple

A unique cultivar found in eastern Canada. In spring, beautiful, "bird of paradise" buds are striking. In summer, the glossy green leaves have a velvety purple underside. In the fall, the leaves turn yellow with magenta undersides, with accents of red, salmon, and orange. Great for urban or commercial settings, and superior disease resistance.

Height 11' Spread 5' Zone 2

Sester Dwarf® Spruce

A densely branched, conical shaped spruce with striking blue needles, Sester Dwarf® is a slow growing conifer discovered by Gordon Sester. This low maintenance, pint-sized version of a Colorado Blue Spruce is ideal for suburban landscapes.

DISCOUNT APPLIES FOR TOTAL SEASON PURCHASES

Dollar volume discount applies for the total amount of dollars spent
